School Name	Sycamore Canyon Elementary School/ LRC	
IMPOR	TANT: This form is only a summary list of structural tests and some of the special	
inspecti	ions required for the project. Generally, the structural tests and special inspections	
noted o	n this form are those that will be performed by the Geotechnical Engineer of Record,	
Laborat	tory of Record, or Special Inspector. The actual complete test and inspection program	
must be	e performed as detailed on the DSA approved documents. The appendix at the bottom	
of this f	orm identifies work NOT subject to DSA requirements for special inspection or	
structur	ral testing. The project inspector is responsible for providing inspection of all facets of	
constru	ction, including but not limited to, special inspections not listed on this form such as	
structur	ral wood framing, high-load wood diaphragms, cold-formed steel framing, anchorage of	
non-stri	uctural components, etc., per Title 24, Part 2, Chapter 17A.	

NOTE: This form is also available for projects submitted for review under the 2007, 2010, and 2013 CBC.

District Santee School District

INSTRUCTIONS: Click a plus sign (+) before any category or subcategory to reveal additional tests and special inspections. A shaded box indicates a test or special inspection that may be required, depending on the scope of the construction and other issues. A shaded box can be clicked indicating your selection of that test. Note: A minus (-) on a category or subcategory heading indicates that it can be collapsed. However, any selections you may have made will be cleared. Click on the "COMPILE" button to show only the tests and inspections finally selected. For more information on use of this form, see DSA-103.INSTR.

	Note: References are to the 2010	6 edition of the Ca	alifornia	Building Code (CBC) unless otherwise noted.
-	SOILS (Indicate if project has geotechn	ical repor	t):	Project has a geotechnical report, or CDs indicate soils special inspection is required by GE. Project does NOT have and does NOT require a geotechnical report.
-	1. GENERAL:	Table 1705A	A.6	
X	 a. Verify that: site has been prepared properly prior to placement of controlled fill and/or excavations for foundations, foundation excavations are extended to proper depth and have reached proper material, and materials below footings are adequate to achieve the design bearing capacity. 	Periodic	GE*	* By geotechnical engineer or his or her qualified representative. (See Appendix for exemptions.)
-	2. SOIL COMPACTION AND FILL:	Table 1705/	4.6	
X	a. Perform classification and testing of fill materials.	Test	LOR*	* Under the supervision of the geotechnical engineer.
X	 b. Verify use of proper materials, densities and inspect lift thicknesses, placement, and compaction during placement of fill. 	Continuous	GE*	* By geotechnical engineer or his or her qualified representative. (Refer to specific items identified the Appendix for exemptions where soils SI and testing may be conducted under the supervision or geotechnical engineer or LOR's engineering manager. In such cases, the LOR's form DSA 291 sh satisfy the soil SI and test reporting requirements for the exempt items.)
X	c. Compaction testing.	Test	LOR*	* Under the supervision of the geotechnical engineer. (Refer to specific items identified in the Appendix for exemptions where soils testing may be conducted under the supervision of a geotechnical engineer or LOR's engineering manager. In such cases, the LOR's form DSA 291 sh satisfy the soil test reporting requirements for the exempt items.)

Application	

Date Submitted:

11/1/2019 Revised:

Revised: 1/14/2020 Revised:

04-118743

Х	a. Verify use of required design mix.	Periodic	SI	Table 1705A.3 Item 5, 1910A.1 (1909.2.3 ⁺)
X	b. Identifiy, sample, and test reinforcing steel.	Test	LOR	1910A.2 (1909.2.4 ⁺); ACI 318-14 Section 26.6.1.2. DSA IR 17-10.16 (See Appendix for exemptions.)
x	c. During concrete placement, fabricate specimens for strength tests, perform slump and air content tests, and determine the temperature of the concrete.	Test	LOR	Table 1705A.3 item 6; ACI 318-14 Sections 26.5 & 26.12
X	d. Test concrete (f _c).	Test	LOR	1905A.1.16 (1909.3.7 ⁺); ACI 318-14 Section 26.12.
	Inspection:			•
X	e. Batch plant inspection Continuous Periodic	See Notes	SI	Default of 'Continuous' per 1705A.3.3; If approved by DSA, batch plant inspection may be reduced to 'Periodic' subject to requirements in Section 1705A.3.3.1 or eliminated per 1705A.3.3.2. (See Appendix for exemptions.)
-	11. POST-INSTALLED ANCHORS:			
x	a. Inspect installation of post-installed anchors	See Notes	SI*	1616A.1.19, Table 1705A.3 Item 4a (Continuous) & 4b (Periodic) (See Appendix for exemptions). ACI 318-14 Sections 17.8 & 26.13 * May be performed by the project inspector when specifically approved by DSA.
Х	b. Test post-installed anchors.	Test	LOR	1910A.5 (1909.2.7 ⁺). (See Appendix for exemptions.)
+	MASONRY	TMS 402-13/A	CI 530-1	3/ASCE 5-13 Table 3.1.3 & TMS 602-13/ACI 530.1-13/ASCE 6-13 Table 5
-	STEEL, ALUMINUM	Table 1705A.2	.1, AISC	303-10, AISC 360-10, AISC 341-10, AISC 358-10, AISI S100-07/S2-10
-	17. STRUCTURAL STEEL, COLD-FORMED STE	EL. AND AL	UMIN	UM USED FOR STRUCTURAL PURPOSES
	Material Verification:	,,	•	
	a. Verify identification of all materials and:			
x	 Will certificates indicate material properties that comply with requirements, Material sizes, types and grades comply with requirements. 	Periodic	*	2203A.1 (2203.1 ⁺), Table 1705A.2.1 Item 3a-3c; AISI S100-07/S2-10 Section A2.1 & A2.2, AISI S200-12 Section A3, AISI S220-11 Section A4. * By special inspector or qualified technician when performed off-site.
Х	b. Test unidentified materials	Test	LOR	2203A.1 (2203.1 ⁺).
X	c. Examine seam welds of HSS shapes	Periodic	SI	DSA IR 17-3.
	Inspection:			
X	 Verify and document steel fabrication per DSA approved construction documents. 	Periodic	SI	Not applicable to cold-formed steel light-frame construction, except for trusses (1705A.2.4).
-	19. WELDING:			1705A.2.5, Table 1705A.2.1 Items 4 & 5; DSA IR 17-3, AWS D1.1 and AWS D1.8 for structural steel, AWS D1.2 for Aluminum, AWS D1.3 for cold-formed steel, AWS D1.4 for reinforcing steel. (See Appendix for exemptions.)
	Verification of Materials, Equipment, Welders, etc:			
X	a. Verify weld filler material identification markings per AWS designation listed on the DSA approved documents and the WPS.	Periodic	SI	DSA IR 17-3.
X	 Verify weld filler material manufacturer's certificate of compliance. 	Periodic	SI	DSA IR 17-3.
X	c. Verify WPS, welder qualifications and equipment.	Periodic	SI	DSA IR 17-3.
		-	<u> </u>	+
-	19.1 SHOP WELDING			
	 19.1 SHOP WELDING: a. Inspect groove welds, multi-pass fillet welds, single pass fillet welds > 5/16", plug and slot welds 	Continuous	SI	Table 1705A.2.1 Item 5a1-4. Per AISC 360-10 (and AISC 341-10 as applicable). DSA IR 17-3.

Appendix: Work Exempt from DSA Requirements for Structural Tests / Special Inspections

Exempt items given in IR A-22 or the 2016 CBC (including DSA amendments) and those items identified below with an "X" by the design professional are NOT subject to DSA requirements for the structural tests *I* special inspections noted. <u>Items marked as exempt shall be identified on the approved construction documents</u>. The project inspector shall verify all construction complies with the approved construction documents.

	Ned Dela
k	rented by prot.
~~	Soils:
	1. Deep foundations acting as a cantilever footing designed based on minimum allowable pressures per CBC Table 1806A.2 and having no geotechnical report for the following cases: A) free standing sign or scoreboard, B) cell or antenna towers and poles less than 35'-0" tall (e.g., lighting poles, flag poles, poles supporting open mesh fences, etc.), C) single- story structure with dead load less than 5 psf (e.g., open fabric shade structure), or D) covered walkway structure with an apex height less than 10'- 0" above adjacent grade.
	2. Shallow foundations, etc. are exempt from special inspections and testing by a Geotechnical Engineer for the following cases: A) buildings without a geotechnical report and meeting the exception item #1 criteria in CBC Section 1803A.2 supported by native soil (any excavation depth) or fill soil (not exceeding 12" depth per CBC Section 1804A.6), B) soil scarification/recompaction not exceeding 12" depth, C) native or fill soil supporting exterior non-structural flatwork (e.g., sidewalks, site concrete ramps, site stairs, parking lots, driveways, etc.), D) unpaved landscaping and playground areas, or E) utility trench backfill.

.___

Welding:

1. Solid-clad and open-mesh gates with maximum leaf span or rolling section for rolling gates of 10' and apex height less than 8'-0" above lowest adjacent grade. When located above circulation or occupied space below, these gates are not located within 1.5x gate/fence height (max 8'-0") to the edge of floor or roof.

2. Handrails, guardrails, and modular or relocatable ramps associated with walking surfaces less than 30" above adjacent grade (excluding post base connections per the 'Exception' language in Section 1705A.2.1); fillet welds cannot be ground flush.

Page 6 of 6

Concrete/Masonry:

in exempt item 3 for "Welding."

applicable wall condition.

1. Post-installed anchors for the following: A) exempt non-structural components (e.g., mechanical, electrical, plumbing equipment - see item 7 for "Welding") given in CBC Section 1616A.1.18 (which replaces ASCE 7-10, Section 13.1.4) or B) interior nonstructural wall partitions meeting criteria listed

Concrete batch plant inspection is not required for items given in CBC Section 1705A.3.3.2 subject to the requirements and limitations in that section.

 Non-bearing non-shear masonry walls may be exempt from certain DSA masonry testing and special inspection items as allowed per IR 21-1.16. Refer to construction documents for specific exemptions accordingly for each

4. Epoxy shear dowels in site flatwork and/or other non-structural concrete.

5. Testing of reinforcing bars is not required for items given in CBC Section 1910A.2 subject to the requirements and limitations in that section.

DSA-103 Revised 5/8/2019

List of Required Structural Tests & Special Inspections - 2016 CBC

te	INCREMENT #	INCREMENT # DSA File No.: Application No.:			
BC	Date Submitted:	11/1/2019	Revised: Revised:	1/14/2020	
	 Non-structural interior cold-formed s partitions, interior soffits, etc. supportir masonry, stone, or terra cotta veneer r and not over an exit way. Maximum tril occurring from a 10'x10' opening in a 1 	ng only self weight and light- no more than 5/8" thickness butary load to a member sha	weight finish and apex les Il not excee	es or adhered tile, ss than 20'-0" in height	
	4. Manufactured support frames and c mechanical, electrical, or plumbing eq (connections of such frames to supers as noted in selected item(s) for section	uipment weighing less than 2 structure elements using weld	2000# (equip ding will requ	oment only)	
	 Manufactured components (e.g., To hanger support and bracing (connection welding will require special inspection listing above). 	ons of such components to s	uperstructur	e elements using	
	 TV Brackets, projector mounts with (e.g., playground structures, basketbal superstructure elements using welding section 19, 19.1 and/or 19.2 of listing a 	ll backstops, etc.) (connectio g will require special inspectio	ns of such e	elements to	

7. Any support for exempt non-structural components given in CBC Section 1616A.1.18 (which replaces ASCE 7-10, Section 13.1.4) meeting the following: A) when supported on a floor/roof, <400# and resulting composite center of mass (including component's center of mass) <= 4' above supporting floor/roof, B) when hung from a wall or roof/floor, <20# for discrete units or <5 plf for distributed systems.
